

Hygiene concept 2021 - Bavaria

Instruction sheet for **Riders/ Tournament Helpers**

Primary protection goals are:

1. enabling the respective current distance rules to be applied
2. traceability of contacts
3. feasibility of the german 3G concept (vaccinated, tested, recovered)

What applies to **riders/tournament helpers**? (as of beginning of september 2021):

Masks are compulsory in the show area (stables, warm-up areas, stable and show office, entry and exit).

- The federal SARS-CoV-2 occupational health and safety regulation applies on and around the horse, so you are responsible for your own health and compliance with your contagion prevention.
- Without a horse, the obligation to wear a medical mouth/nose covering or higher (FFP2 mask) applies in these areas.

Obligation to wear a mask in other areas of the fair (sales, catering and event areas)

- Away from "professional activities", i.e. specifically when in the **visitor area**, you are also subject to the "Bay. Hygiene Concept for Trade Fairs" also applies to you. This obliges you to wear a medical mask in the halls. Outside, the mask may be removed if the minimum distance can be safely maintained.

General

- For you and your employees, the current federal occupational health and safety guidelines apply.
➔ <https://www.bmas.de/DE/Service/Gesetze-und-Gesetzesvorhaben/sars-cov-2-arbeitsschutzverordnung.html>
- Instruction of employees in hand hygiene and individual hygiene standards

Entry regulation:

- A check according to the german 3G admission concept (vaccinated, tested, recovered) for **riders and their assistants** is necessary. Vaccinated and convalescent riders will receive a tournament wristband after inspection, which will allow daily access from then on. Non-vaccinated and convalescent riders must prove a negative rapid test every 24 hours, this will be done every time they enter the show grounds.
- The control of the 3G regulation for riders/show assistants will take place at the signposted **logistic point** outside the exhibition grounds. This is to avoid waiting times for you at the regular entrances.

Outlook for our **VISITORS** (as of beginning of september 2021):

- Admission to the fair for visitors only if one of the 3Gs is proven.
➔ Visitors are comprehensively informed in advance, test stations are available in the immediate vicinity
- Indoor areas: obligation to wear a medical mask
- Open-air grounds: obligation to wear a medical mask if the minimum distance cannot be maintained
